

Securitas improves its security solutions thanks to Situm's indoor positioning technology

- **Securitas Location improves security management, helps the guards and provides a whole new set of location-based solutions, services and products to its customers**
- **La Fira de Barcelona already have this service, which will be tested at Mobile World Congress 2017**

Madrid, February 3rd, 2017.- Securitas, leading provider of security solutions, has incorporated Situm's indoor positioning and navigation technology to develop **Securitas Location**, a solution that gives precise location of security personnel inside a building. In this way, the company provides more safety to its guards who could indicate precisely the location of any incident, in addition to know its position in real time.

Furthermore, [Securitas](#) will provide its customers with a whole new set of location-based solutions, services and products, like security personnel tracking, indoor navigations, assistance and emergency services, etc. All these new solutions can be provided in all kind of large facilities (company headquarters, shopping centers, airports...) thanks to the Securita's worldwide presence in public and private buildings.

Securitas obtains a high-precision technology to offer additional security and management functionalities, while reducing the cost, error and deployment time, compared to other indoor positioning solutions, thanks to [Situm's](#) lower installation time and maintenance.

Jesús de la Mora, Securitas's Consulting Director, highlighted that "[Securitas Location](#), based on Situm's indoor positioning technology, is a key element to the security personnel, and, especially, a transparency portal to our clients. Location, along with real-time risks management, gives considerable advantages by providing a more efficient service with the client interacting with the security team".

Situm's indoor positioning technology at Mobile World Congress 2017

[La Fira de Barcelona](#) will make use of Securitas Locations in its facilities of Gran Vía, where many large worldwide events are held every year. The solutions provided thanks to Situm's indoor positioning technology will be tested at [Mobile World Congress 2017](#).
